

Table 1: Performance on two MMLU subjects from autoregressive language modeling experiments. The other subjects are omitted because model accuracy consistently fell below random guessing, limited by training data and model capacity. All reported metrics represent test accuracy (%), where higher values indicate better performance. The best results for each benchmark are in **bold**.

Model	Social Society	STEM	Average
Transformer	27.8	27.7	27.8
Linear Trans.	26.5	24.2	25.4
Cosformer	25.9	25.1	25.5
Hedgehog	27.9	25.9	26.9
Flexformer _n	30.3	27.5	28.9
